CORE SKILLS

Endpoint Management: Microsoft Intune, Jamf Pro, Windows Autopilot, macOS & Windows administration, PDQ Deploy, device lifecycle & compliance reporting

Identity & Directory Services: Entra ID, Active Directory, hybrid identity, Conditional Access, group policy & OU management

SaaS & Collaboration Platforms: Microsoft 365, Exchange Online, SharePoint, Teams, Google Workspace, Slack, Zoom

Automation & Scripting: PowerShell, Python, Bash — access reviews, audit reporting, deployment tooling

Networking & Security: TCP/IP, DNS, DHCP, VPN (Palo Alto GlobalProtect), Netskope CASB/DLP, Zscaler, Barracuda WAF

Privileged & Identity Governance: CyberArk, Senha Segura, Azure Just-in-Time access, SailPoint, Okta

Ticketing & Documentation: Jira Service Desk, Zendesk, Confluence, runbooks & operational standards

WORK EXPERIENCE

IT Analyst / Team Lead | BTG Pactual — New York, NY

03/2025 – Present

- Serve as primary escalation point for identity, endpoint, and access incidents across global teams, administering Microsoft 365, Exchange Online, Teams, SharePoint, Intune, and Entra ID.
- Lead endpoint lifecycle management including Autopilot provisioning, Intune-based device provisioning and policy management, PDQ Deploy software distribution, and device compliance reporting for audit readiness.
- Administer Active Directory and Entra ID, managing identity governance, group policies, and access controls across hybrid environments.
- Administer Palo Alto firewalls, GlobalProtect VPN, and Netskope CASB (including mobile) to enforce network and cloud-access security controls.
- Manage Conditional Access configurations and enforce DLP policies, including endpoint DLP scoping by user and device.
- Support privileged access governance, administering Senha Segura for credential/session management and Azure Just-in-Time access; use SailPoint to streamline user access requests.
- Manage identity and access requests via Jira Service Desk; document processes and standards in Confluence.

Infrastructure Analyst | SPX Capital — New York, NY

08/2024 – 02/2025

- Administered Google Workspace and Microsoft 365 tenants for enterprise users, managing licensing, access controls, and user lifecycle operations.
- Managed Intune and Jamf MDM environments for a mixed Windows/macOS fleet; enforced least-privilege access and lifecycle-based provisioning policies.
- Maintained detailed asset inventory and device compliance documentation to support audit readiness and security reviews.
- Identified and resolved recurring issues at the root-cause level, reducing ticket volume and improving end-user experience.

Technology Analyst | Carnegie Hall — New York, NY

05/2019 – 08/2024

- Deployed and maintained macOS endpoints integrated with Active Directory using JAMF; administered Microsoft Intune for Windows endpoint compliance and Autopilot provisioning.
- Managed Active Directory and hybrid identity, overseeing user lifecycle, group policies, OU structure, and directory synchronization between on-premises AD and Azure AD.
- Administered Microsoft 365 in a hybrid Exchange environment, managing Exchange Online/on-premises mailboxes, SharePoint sites, and Teams governance for 300+ users.
- Administered CyberArk for privileged access management, securing and governing privileged credentials across the environment.
- Administered Zscaler as the organization's cloud security gateway, enforcing web filtering, SSL inspection, and zero-trust network access policies.
- Managed Barracuda Web Application Firewall, maintaining security policies and monitoring traffic for threats.
- Managed access and support requests via Zendesk for ticketing and Confluence for documentation.

Monitoring Analyst | Neogrid — Porto Alegre, RS, Brazil

06/2017 – 08/2018

- Monitored end-to-end data pipeline integrity between retail partners and internal applications; queried Oracle Database to troubleshoot discrepancies and support incident investigations.
- Managed incident tracking via Jira and leveraged Grafana dashboards to monitor system performance and proactively identify anomalies.

IT Support Analyst | Axur — Porto Alegre, RS, Brazil

04/2014 – 11/2016

- Served as the sole IT resource for the organization, owning user support, hardware lifecycle, vendor management, and documentation as the first and only IT stakeholder.
